

Before you get started here are a few quick notes:

On Jun 6th UPS is requiring all customers to transition over to a new way of connecting to the UPS quotes/rating system. We have updated your site to be compatible, but we will need new credentials created from within your account. It will take you 5-10 minutes to complete these steps. When you are done, can you please send to us these UPS credentials:

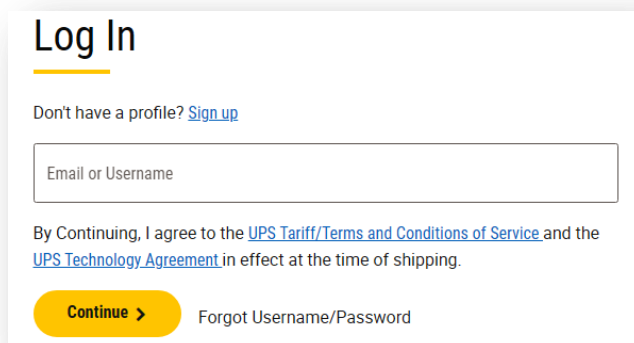

- Client ID
- Client Secret
- Billing Account Number

Ok, let's get started!

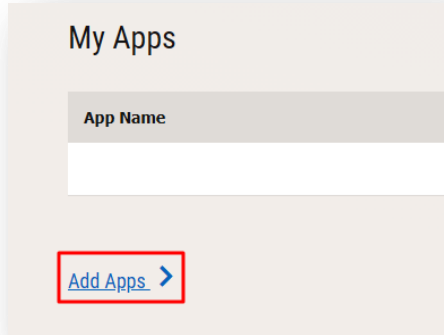

- Visit <https://developer.ups.com> and click "Create Application" (they'll ask you to log in next):

- Now, Log In with your username and password:

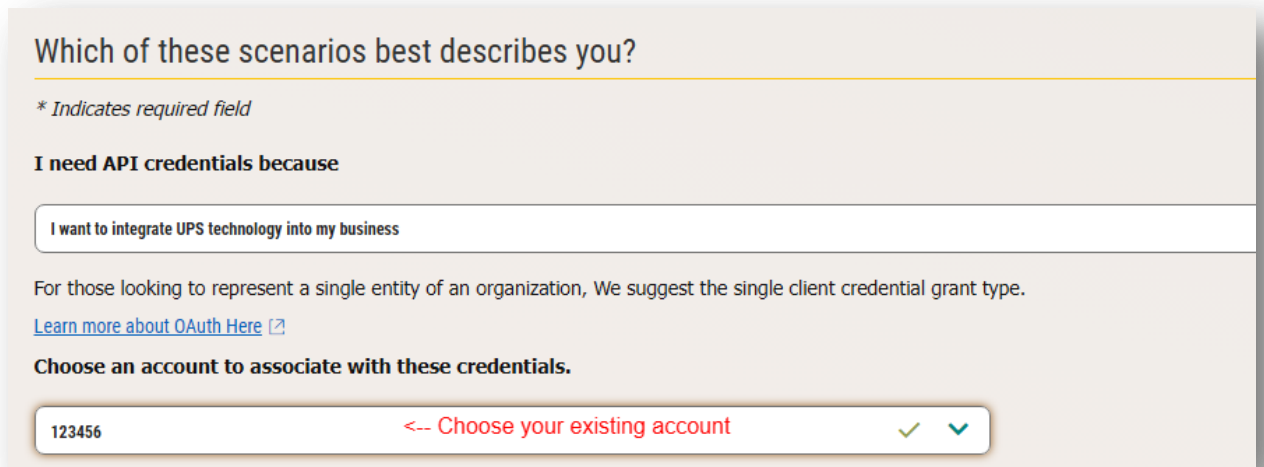

- Click here to head over to the UPS Developer Apps area:
https://developer.ups.com/apps?loc=en_US
- Now click the “Add Apps” link:

- Choose the following options and then click “Next”. If you have an existing account you can use it. If you do not have an existing account, you will need to go through a few extra steps to add one.

(Please create the account and return to this step.)

A screenshot of a form titled "Which of these scenarios best describes you?". It includes a note "* Indicates required field". A dropdown menu is open, showing the selected option "I want to integrate UPS technology into my business". Below the dropdown, there is explanatory text and a link "Learn more about OAuth Here". At the bottom, there is a label "Choose an account to associate with these credentials." and a dropdown menu showing the account ID "123456" with a red prompt "<-- Choose your existing account" and two green checkmark icons.

- Fill out the Primary Contact Info fields and click Next

- In the “Add App” section, look to the Right Side of the page first. Navigate to the 2nd group of apps and select “Rating”:

Add Products

Search Category >

- Rating**
Compare delivery services and shipping rates to determine the best option.
- Time In Transit**
Gives customer's the ability to determine the delivery time for UPS services.
- Shipping**
Prepare your package for shipment, manage returns, and cancel scheduled shipments.
- Tracking**
Track status of a shipment, delivery , time, and the latest transit scan.
- Dangerous Goods**
Validate Air, Ground, and International Dangerous Goods shipments are acceptable to UPS.
- Landed Cost Quoting**
Customers get estimated duties, taxes, and brokerage fees for cross border shipments.

- Then fill out the App Details fields on the left side of the page and click Save. When you are done it should look like this:

Apps Details

** Indicates required fields*

App Name

Timber Checkout Shipping Estimates ✓

Your application name will be visible to users if using Auth-Code.

Callback URL

https://yourdomain.com/upscallback

External site to which a consumer of this app is redirected to log in when using auth-code flow. For multiple callback URLs, add commas separating the URLs with no spaces in between.

Billing Account Number

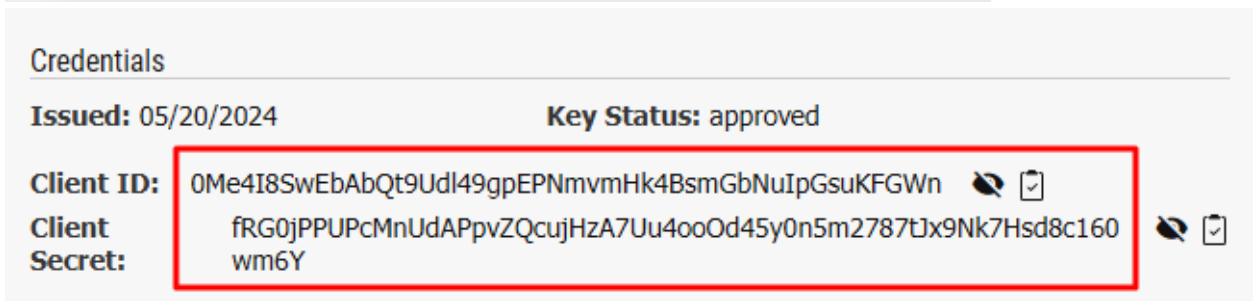

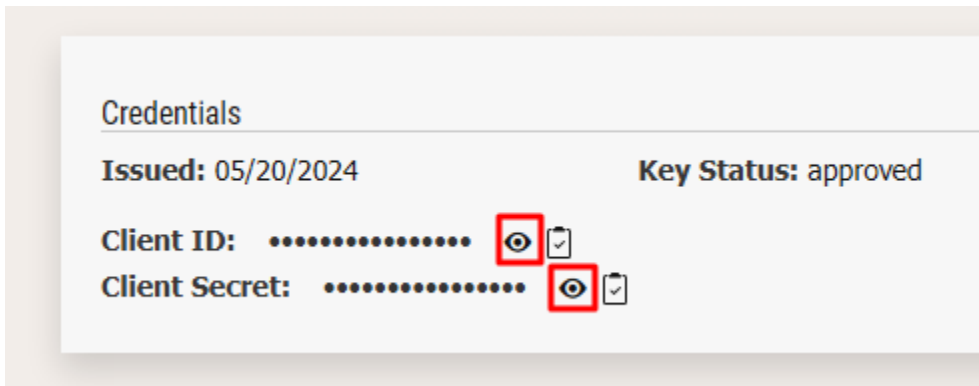

123456 ✓

Products Included In This App *

Authorization (OAuth)	Pending	
Rating	Pending	

[Cancel](#) **Save >**

- To complete the integration on your site, we will need the **Client ID** and the **Client Secret**. Please click the Show (eyeball) icon, and then copy/paste these two credentials into an email back to us:

- In addition to the **Client ID** and **Client Secret**, please also include your 6-digit Account ID / **Billing Account Number**

Once we receive your credentials, we will update your site. You should not notice any differences in how the quotes work on your Checkout page.
